## Work experience

### ● Front End Developer

5Cube

Since Jan. 2024

- Transformed Figma designs into fully responsive Vue.js and Nuxt.js applications, utilizing Tailwind CSS, the Composition API, and TypeScript.
- Engineered responsive layouts optimized for various devices (mobile, tablet, desktop) using Tailwind CSS within Vue.js and Nuxt.js frameworks.
- Developed and maintained dynamic, high-performance frontend applications for ERP systems using Nuxt.js, ensuring seamless integration with APIs.
- Spearheaded the development in Nuxt.js with the Composition API and TypeScript, enabling efficient management and tracking of users and job postings.

### ● React-JS Internee

HNH TECH SOLUTIONS

Jun. 2023 – Dec. 2023

- Developed and integrated RESTful APIs in React.js, managing seamless data flow between frontend and backend systems.
- Implemented user authentication, form handling using Formik, and state management with Redux and Redux Toolkit to ensure efficient application performance.
- Crafted responsive, cross-device layouts with HTML5, CSS3, and Bootstrap, optimizing user experience on all screen sizes.

## PROJECTS

### Pharma Career Hub Admin Panel

- Engineered an admin panel in Nuxt.js with TypeScript, featuring robust user and job management capabilities, including tracking and comprehensive CRUD operations.
- Integrated user feedback and profile update functionalities to improve user engagement and overall interaction experience.
